

Madison Loan OriginationTM For Commercial Loan Brokers

Summary

Madison Loan Origination for Brokers tracks each loan through the entire loan origination process. An impressive array of origination reports and analytics are available.

Technology

The Madison SystemTM is a browser-based application that may be hosted on client or third party servers. Eliminate silos of information – share information with all authorized users regardless of location.

System Benefits

The Madison SystemTM will help you increase your origination capacity without increasing staff.

More Information

For more information call (781) 639-8171 or visit us at: www.madisonassociatesllc.com.

Madison Loan Origination for Brokers is designed for commercial loan brokers. It supports the origination of commercial loans, presentation to investors, and management of loans through closing. All the features of Madison Loan Origination are available. In addition, investors can log on to see loans in which they may invest, and the status of loans that they have elected to fund. The System will increase productivity and provide unparalleled service to investors.

Investor Reports and Presentations

Quickly and efficiently prepare a comprehensive package of information for investors that can be distributed by e-mail, or by allowing investors to log on to your site.

Generate Loan Origination Documents

Automatically create letters, applications, commitments and other loan origination documents that draw information from the database, avoiding the need to enter the same data multiple times. Use and share Checklists to track the completion of documents and origination tasks.

Save Electronic Documents and Files

Store and share documents that support the lending decision – underwriting analysis, appraisals, photographs, maps, and letters – and retrieve them instantly.

Production Reports

Manage your origination pipeline with an impressive array of production reports that give you a clear picture of the entire origination process.

Productivity Reports

Use the productivity reports to measure the efficiency and effectiveness of each step in the origination process.

Monitor why lending opportunities were lost.
