

Madison Reports

Summary

Madison Reports is a commercial loan and commercial real estate loan reporting system that can be connected to other Madison Systems or to other databases such as a loan servicing and accounting systems. It provides an extensive and highly flexible reporting capability.

Technology

The Madison SystemTM is a browser-based application that may be hosted on client or third party servers. Eliminate silos of information – share information with all authorized users regardless of location.

System Benefits

The Madison SystemTM will help you increase your origination capacity without increasing staff.

More Information

For more information call (781) 639-8171 or visit us at:
www.madisonassociatesllc.com.

Select from a library of over 150 reports, or elect custom reports, that will allow you to slice and dice the portfolio, or sub-sets of the portfolio, with remarkable ease.

Report Features

Use powerful filters to quickly and easily focus on loans of special interest such as loans of a particular collateral type or market, or with weak performance. Reports include drill down, graphs, summary and detail tables, and can be exported to Excel, Word, PDF or other formats. Information within many reports can be grouped, sorted or filtered by user-selected criteria.

Automatic Report Distribution

Automatically distribute reports by e-mail to officers on a scheduled basis to alert them to important information.

Stress Test Analysis

Stress the entire loan portfolio according to user-selected values. Stress values such as income, value, loan rates, and cap rates. Estimate defaults, extensions, losses and loan loss reserves.

Loan Committee Presentations

Automatically create presentation-ready reports for the loan committee. Reports contain current and historical data for (1) the loan, (2) each item of collateral or supporting business, and (3) each borrower and guarantor, including photos and your loan write-up.

Tickler Reports

The comprehensive tickler system reminds you when important information is due and will generate letters and emails to request information from borrowers and others.

Credit Quality Reports

View special reports that list classified assets, delinquent loans, FASB 114 loans, watch list loans, and many more.
